Subject: FW: CFAC Concrete Sampling Data

Hi Mike:

I did get your voice message. Tried to call but you are at lunch, so I will call again after one.

I've given the Roux backfill request document a cursory review, and think going out to the site to take a look is a great idea. Unfortunately I am scheduled for field work over in Blaine and Hill counties for the next 3 days. I'm wondering if you might consider postponing your CFAC site visit until Monday (5/29)? You sound like you should be home on sick leave anyway...

I will call so we can discuss.

Subject: RE: CFAC Concrete Sampling Data

Hello Mike,

Attached you will find a draft letter describing the results of the concrete sampling activities and CFAC's proposed path forward. The letter is in draft form, as we assume we will be discussing the contents prior to finalizing.

Please let us know if you have any questions. Please also let us know when we can discuss. As you know, this is a time sensitive matter for CFAC and the demolition project.

Subject: CFAC Concrete Sampling Data

Mike,

As discussed on our call today, I am providing results from the concrete sampling in pot room #1. The two tables labeled "validated" are the samples that were collected originally in accordance with the Concrete SAP. The two "unvalidated" sets of data are the results from the recent additional sampling that was completed in accordance with the Concrete SAP modification. I have also attached a map showing the locations where the samples were collected in pot room #1.

A formal letter outlining our proposed path forward will follow.
